Ellwood 21 May 1878

Geo. E Davenport Esqr.

Dear Sir

Yours of 11 inst. is at hand. Many thanks for the information about Polypodium. You have written all I wanted from Appleton & committee on ferns. I was expecting to do something on the subject for the Society. Rather puzzled at first to know what one to select as I am not fond of about ferns contented & concluded to make up a herbarium of N. A. ferns and from time to time write out a few notes containing information of locality abundance &c as I found them & capable. Enclosed please find my first paper. In copying for the printer.

Please do not put any name to the species I send you. I write them on the paper & then cut off the name. Please send me a few specimens of good Pellaea. I have not been able to procure as yet. Specimens of 2 each will do. Please use a thin paper. Please use a fine pen. Please send me a few specimens of Cystopteris. Please use a fine pen. Please send me a few specimens of Asplenium. Please use a fine pen. Please send me a few specimens of Polypodium. Please use a fine pen. Please send me a few specimens of Woodsia. Please use a fine pen. Please send me a few specimens of Adiantum. Please use a fine pen. Please send me a few specimens of Pteris. Please use a fine pen. Please send me a few specimens of Aspidium. Please use a fine pen. Please send me a few specimens of Nephrodium. Please use a fine pen. Please send me a few specimens of Dryopteris. Please use a fine pen. Please send me a few specimens of Phegopteris. Please use a fine pen. Please send me a few specimens of Onoclea. Please use a fine pen. Please send me a few specimens of Struthiopteris. Please use a fine pen. Please send me a few specimens of Lygodium. Please use a fine pen. Please send me a few specimens of Osmunda. Please use a fine pen. Please send me a few specimens of Botrychium. Please use a fine pen. Please send me a few specimens of Ophioglossum. Please use a fine pen. Please send me a few specimens of Equisetum. Please use a fine pen. Please send me a few specimens of Lycopodium. Please use a fine pen. Please send me a few specimens of Selaginella. Please use a fine pen. Please send me a few specimens of Isoetes. Please use a fine pen. Please send me a few specimens of Marsilea. Please use a fine pen. Please send me a few specimens of Azolla. Please use a fine pen. Please send me a few specimens of Equisetum. Please use a fine pen. Please send me a few specimens of Lycopodium. Please use a fine pen. Please send me a few specimens of Selaginella. Please use a fine pen. Please send me a few specimens of Isoetes. Please use a fine pen. Please send me a few specimens of Marsilea. Please use a fine pen. Please send me a few specimens of Azolla.

some omissions have made which you will find corrected.

I had moisture specimens of each of the fourteen species to distribute and remarks. As that point effect has quite interesting. For my next attempt I have all the Polypodiums in good specimens to exhibit or card along with your notes as to locality &c. and hope they may be appreciated by our members, and others who may be present.

I went with a party last Saturday to visit the Cañon of the "Cathedral Peaks" in the hope that we might find a new Adiantum. that is reported to grow there. We did not find the Adiantum in the Cañon but one of the Company

Jeanne Phillips Woodward. Received Sept 1st 1894. Answered Sept 4th 1894.

Dear Miss Eaton

I am sorry to say that I have not yet found the Adiantum you mention. I have been looking for it in every canyon I have visited this season, but have not found it. I have found a good deal of Cheilanthes Lindheimeri, and Cheilanthes Fendleri, but not the Adiantum. I have been looking for it in the Cañon of the Arroyo Seco, but have not found it there. I have also been looking for it in the Cañon of the Arroyo Hondo, but have not found it there. I have also been looking for it in the Cañon of the Arroyo Chamisa, but have not found it there. I have also been looking for it in the Cañon of the Arroyo Tesuque, but have not found it there. I have also been looking for it in the Cañon of the Arroyo Pojoaque, but have not found it there. I have also been looking for it in the Cañon of the Arroyo Nambe, but have not found it there. I have also been looking for it in the Cañon of the Arroyo Cañada, but have not found it there. I have also been looking for it in the Cañon of the Arroyo Cañada, but have not found it there.
